

Agilent 970-Series Handheld Multimeters

Data Sheet

Benchtop features and performance with handheld convenience and price

- **3½ and 4½ digits with dcV accuracy to 0.05%**
- **1 kHz to 100 kHz frequency response**
- **Sophisticated math functions**
- **True rms, dB/dBm available**

Bench and field measurements

Agilent Technologies 970-series handheld multimeters give you much more than just the basics. These compact multimeters have the features you'd expect from a bench meter, like sophisticated math functions that allow relative difference or percent readings for checking tolerances and Min/Max with time stamp to monitor all types of measurements including high resolution temperature readings.

These DMMs also include a hold feature to let you save readings manually or automatically and a measurement averaging capability to use when you're working with noisy signals. An auto diode feature automatically reverses polarity for you when you're checking semiconductor junctions.

Measure with confidence

An innovative safety shutter prevents accidental connection to the current terminals. All models feature high-energy fuses and audible overload alarms. A selectable auto power off mode conserves batteries.

Use the rugged 971A in every environment

The 971A is designed to withstand the toughest environments. Like the other handhelds in the 970 series, the 971A provides ac/dc volts, and current, ohms, continuity, diode test, auto diode test, frequency volts and °F and °C high-resolution temperature measurements.

Measure low-level dc/ac volts or capacitance with the 972A

For measuring low-level signals, the 972A gives you 40 mV ranges for dc/ac voltage and the assurance of 20 kHz frequency response. For capacitance testing, the 972A measures from 10 pF to 1000 µF. A convenient dual display shows the range, elapsed time, or reference values, in addition to your reading.

The 973A gives you more ways to test and troubleshoot

The 3½-digit display (with 0.1% basic dc accuracy), 20 kHz frequency range, true rms and ac+dc readings let you measure sinusoidal and nonsinusoidal waveforms with confidence. The 973A also gives you dBm and relative dB with dynamic range of 57 dB (2 mV to 400 mV) or 74 dB (0.2 V to 1000 V), with 0.1 dB resolution. This DMM also features dual displays.

Use the 974A when extra precision is required

For precision measurements, the 974A gives you 4½ digits with a 49,999 count full scale, and basic dc accuracy of 0.05% for all ranges. It also offers true rms, 100 kHz frequency response, dBm /relative dBm readings, and ac+dc readings to accurately measure nonsinusoidal waveforms.

3-year warranty

With 970-series handheld multimeters you get a manual, a high-quality test lead set, a calibration certificate, spare fuse, rubber boot, and two installed AA batteries. Each instrument comes with a 3-year warranty.

Test Current: 0.8 mA nominal, <3.2 V
Range 0-400 Ω, 0.1 Ω resolution
Threshold: <20 Ω

Relative	Measures the difference from a reference value.
Per Cent	Displays the per cent change from reference.
Min/Max	Records the minimum and maximum value of the input, with audible alert, and elapsed time; the 974A also computes long term average in Min/Max.
Average	Displays the average of the last 8 readings.
Data-Hold	Holds the display reading. Shows input value on dual display (972A, 973A).
Auto Hold	Stores last stable reading and displays it when probe is removed from test circuit.
Range	Select auto ranging or manual ranging.
Auto Diode	Choose normal diode test, or Auto Diode for automatic reversal of polarity.
Temperature	Thermistor temperature for high accuracy and 0.1° C resolution and thermocouple (973A only) for high temperatures.
Dual Display	972/3A, one large main and a secondary display for two digital readouts.
Overload Alert	Input overload alert provides audible tone when input is overloaded or in wrong terminal. Fuse check for 971/2/3A.
Safety Shutter	Unique terminal shutter that helps prevent inadvertent use of current terminals.
Auto Power Off	Turns off power to save batteries after 30 minutes of inactivity or choose to defeat auto power off.
Zero adjust	Stores zero between function changes for critical measurements: Ohms zero (971/2/3/4A), dcV and Capacitance zero (972/3A).
ac+dc	The 973A, 974A, displays ac+dc true rms.
dBm/dB	The 973A, displays dBm and input voltage on dual display; the 974A has 0.01 dB resolution.
