

11-01019: 10 cell (68.5 watt hour) Long-lasting, Li-Ion Battery

- Industry's highest capacity extended-life 68.5 Whr Li-Ion 10-cell battery provides up to 6.5 hours of operating time (Passmark Battery Test)
- Optional 55 Whr lithium ion 8-cell battery provides approximately 4 hrs¹ of normal operating run time
- Both battery options insert into a sealed and secure repository on the back of the system and sit flush, thereby ensuring the battery is an integral part of the overall system and does not protrude or extend outside of the mechanical structure
- The batteries are user/field-replaceable via a quick lock/unlock mechanism for expedited replacement
- Warm swap battery support – The iX104C5 also has a 6-cell bridge battery that provides 3-5 minutes of life (full charge) – ample time to replace batteries while in field
- Physical battery health meters are integrated into each of the batteries and a software-based meter is also resident on the system
